Installation Images (Outdoor & Indoor both)

We are replacing in stages this Project of 17 Industrial Evaporative Units of Previous Master Cool Models Made of Sheet Steel, we have already installed 03 units model **MHC-34-36** here we are being more efficient and giving the client better operation per work area of the technicians and employees of the CRC area.

Installation Images (Outdoor & Indoor both)

Design of ductwork and evaporative air distribution in each work area by our master distributor DPI (Eng. Luis Albar Reynoso).

Redesign and replacement of units with the new **MHC-36-34** model, better air exposure to the user is obtained as a spot cooling system, and also savings in energy and water consumption.
